

We Control Water

TERRY discovered it was far better to control water rather than just manage what Mother Nature provides. Using its proprietary scale elimination technology, TERRY eliminates existing scale build-up. More impressive is its ability to maintain a scale preventative environment.

Technology

All TERRY products dispense a controlled quantity of Citryne™ which eliminates calcium that forms calcium carbonate (scale) in various types of equipment.

Citryne™ is non-toxic, non-corrosive and biodegradable.

Solutions

At the heart of the TERRY product philosophy is a firm commitment to provide real solutions to end-users. It is not just another "scale reducer" technology that is plagued by inconsistent results that are only effective in certain regions of the world. We control water everywhere, regardless of the geographic location.

Never before has there been a more effective stand-alone scale elimination technology than TERRY scale elimination.

SMK1

- Scale Elimination for ice makers up to 800 lbs. & table top steamer cookers.
- Up to 6 months life approximately 9,000 gallons.
- 3/8" easy connect fittings.

SMK2

- Scale Elimination for ice makers up to 2,400 lbs., steam cookers & combi steam cookers.
- Up to 6 months life approximately 15,000 gallons.
- 1/2" easy connect fittings.

SMK3

- Scale Elimination for ice makers over 2,400 lbs., multi-compartment steam cookers & combi steam cookers.
- Up to 6 months life approximately 25,000 gallons.
- 1/2" easy connect fittings.

SMK12

- Scale Elimination for coffee brewers, espresso & cappuccino machines.
- Up to 6 months life approximately 3,000 gallons.
- 1/4" easy connect fittings.

SMK4H

- Scale Elimination for hot water commercial appliances such as warewashers.
- Up to 6 months life approximately 60,000 gallons.
- 1/2", 3/4" & 1" fittings.

SM1 & SM2

- Scale Elimination for ice makers up to 1,200 & 2,400 lbs. & multi-compartment steam cookers.
- Up to 6 months life approximately 15,000 & 22,000 gallons respectively.
- 1/2" NPT fittings @ manifold.

Scale Elimination

Scale problems are the root cause of virtually all equipment service calls. Water with scale prevents equipment from performing as specified and causes premature breakdown of the equipment. The TERRY product line provides a proprietary technology, which has been proven for almost four decades, to provide **scale elimination** solutions around the world.

Pure

Utilizing a proprietary formulation of CITRYNE™, TERRY products eliminate scale without the use of hazardous chemicals. The specialized mechanical release technology provides a scale-free environment in an ongoing basis. This extends equipment life and increases efficiency without restricting flow rates. TERRY products are NSF and FDA approved making them the **pure** solution to scale elimination.

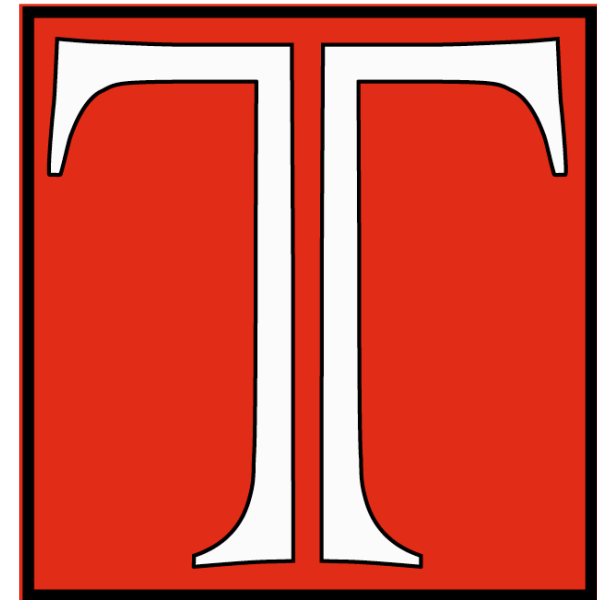

Simple

TERRY products are stand-alone units that are installed in-line. A variety of products are provided to meet the needs of equipment used in restaurants, hospitals, schools, commercial kitchens, cooling towers, misting systems and an array of other applications where scale is a problem. TERRY products are adaptable to any water filtration system. Easy installation and replacement make TERRY products the **simple** solution to scale elimination.
